

# **A SHORT STATEMENT FROM ME AS TO WHY THE INTERNET ARCHIVE IS IMPERATIVE TO THE HUMAN RACES SURVIVAL IN AN EVER INCREASING I.O.T. WORLD**

The Preservation of History and Culture as well as the continued development and Evolution of The Human Spirit/Experience. Knowledge, Wisdom and Truth (and all forms of art and expression in which it is shared) is the power to overcome adversity and is the foundation of continued innovation and development of all aspects of the Human Spirit/Experience/Biological D.N.A. that drives Evolution and to deny any advancement that is being made, has been made, or yet to be made purely FOR THE SAKE OF PROFITS is destined to be the final nail in the coffin for our species that is currently metaphorically on a life support machine and the balance between greed and altruism really is going to decide whether we grow or die out in this critical end of days human race collectively Judgement days and the only trash we see for free in the mainstream is not anything other than the destruction of the human psyche and spirit and the push back will only happen through the lasting legacy OF ALL WHO CAME BEFORE being honoured in the continued growth of the initial idea of man that has survived till now and will for infinity even if that's without our species but I'm getting esoteric and off of the grounded point so ill leave it there but ill also add that any great invention that society uses would be possibly permanently erased should the rights owner decide it was not for the public and his alone.... now how does it make sense for any human to decide that an idea they had 1st is not to be recreated as they own it.... the body turns to compost as does all memory of that human..... should ideas that are great go with them and by the force of law be withheld indefinitely as its their copyright..... the human race is going to hell in a hand basket so we need all the minds with all the knowledge available if we are ever to gain a collective sanity as a a species and secure our current existence in this mortal Organic Vessel the legacy our D.N.A. passes on.....
